REPORTS, ANNOUNCEMENTS, AND OTHER NON-ACTION ITEMS:

ITEM 18. REPORTS:

• BUILDINGS AND GROUNDS

Mr. O’Malley reviewed the Buildings and Grounds report and responded to questions from the Board (a copy of the Buildings and Grounds report is attached and made a part of these Minutes).
Buildings and Grounds:

Bryan Campus:

CPC Remodel - This is the elevator project in the CPC Building. The project is complete and the offices will be used to house the Bryan Campus Recruiting Offices.

Administration/Classroom Remodel - This project is still waiting on several punch list items to be completed by the contractor, Merrell Construction, Inc. The punch list items have not been a deterrent to the functionality of the remodeled space, and we have not processed any pay requests from the contractor since substantial completion. Billy Ballow, architect with Goodwin Lassiter, Inc., and I met with the contractor on July 27, 2010, and discussed the few items that are needed to complete and close-out the project. I have also sent correspondence by mail outlining a time frame for him to complete the project or Blinn would have the punch list items completed and deduct the cost from his balance. I will do everything possible to have the contractor or his bonding company respond before I involve our attorney. On September 13th, I e-mailed the contractor stating that Blinn would seek bids to correct the millwork and replace the carpet in the classroom building and deduct the cost of this work from the balance owed. I have also demanded that the contractor provide the close-out documents before we release any funds.

Allied Health HSC Campus - The project is under construction and according to the contractor; they are seven weeks ahead of schedule. We have started the equipment procurement and the A/V design.

Building E, Student Center - This is a multi-phase project designed to enhance the student services offered on the Bryan Campus. I have negotiated a professional services agreement with Oza Bouchard of Morris Architects and we have started the programming phase of the project. The first task will be a “Student Center Reimplementation Plan” that emphasizes the use of this space for student use. Once the “Student Center Reimplementation Plan” is complete, we will present our findings to the Board at the November Board meeting and seek additional authorizations for the design and construction phases. The budget for this project is $ 500,000.00 and will be funded in this year’s Repair and Replacement budget.

Landscaping/Signage - There is a need to enhance the landscaping at the new Administration Building and in the area of the Transfer Center. Additionally, signage needs to be improved at these locations, as well as, evacuation signage in all buildings.

Workforce/Dental Hygiene - These programs are located in the Post Office Campus Building at 301 Post Office Street. There is a request that when the RadTech Program relocates to the new HSC/Allied Health Building, the space freed up by this move be used to expand the workforce and dental hygiene programs. I will be working on cost estimates to expand their respective spaces.

Building H (presently, the Allied Health Building) - In Fall 2011, this space will become available for additional classroom and faculty offices. Dr. Raspiller has appointed a committee to receive proposals from the Bryan Campus Division Chairs that are seeking additional space for their respective programs. Once the proposals have been received
and graded by the committee, the selection of use will be announced. The goal of the committee is to find the most efficient use of this space with minimal infrastructure improvements.

Central Plant - We have had a very challenging summer and fall from an operational and maintenance prospective. We have an “ice bank” that needs to be replaced; four compressors that might need replacing, or at minimum, improved maintenance; a chiller that is limping along and will need replacement in the next two years; and the control system that should assist in monitoring, needs to be improved. In addition to the central plant needs, we have: filter, valve, air handlers, and other accessories in each of the buildings that need daily maintenance. We have been in discussions with DBR, the mechanical engineering firm we discussed at the last Board meeting, to evaluate our system and operating procedures. Once we get information back from this firm, I will present the findings to the Board with a plan of action to make the necessary improvements.

Brenham Campus:

Student Housing - We have awarded the contract to Collier Construction, for $9,926,000.00 for the construction of the student housing facility. The project is under construction and scheduled for completion by July 15, 2011. The existing agricultural shop building will be salvaged for use by Faith Mission and will be coordinated with Faith Mission and the contractor. The removal of the building will take place after the fall semester. The contractor has poured 70% of the slab.

Central Plant - Chiller #2 replacement project has been completed. There are some piping modifications and electrical improvements that we need to consider at the central plant and this plan will be studied and brought to the Board for future action.

Band Hall - The Band Hall project has been awarded to Collier Construction. We have held the preconstruction meeting and work on the project will begin once contracts are signed and bonds are in place.

Agriculture Facility - We have awarded a Guaranteed Maximum Price (GMP) of $2,133,000.00, to Collier Construction, for the construction of the Ag Shop Building. This project is under construction. The completion of this phase is January 2011, and we plan to host classes in this building for Spring 2011. The framing for the building has been erected and the contractor is placing the interior block walls.

The Ag Classroom Building - The project has been awarded to Collier Construction and once we have a signed contract and have bonds in place, the construction will begin. We have held the preconstruction meeting.

Star of the Republic Museum - The project has been awarded to Gowan Construction. The preconstruction meeting will be held on November 15th, and construction will begin once contracts are signed and bonds have been received.

Campus Wide Fiber Extensions - This project has been awarded to JSL Construction. We have held a preconstruction meeting and construction will begin once contracts are signed and bonds are in place.
• **2009 ANNUAL SECURITY & FIRE REPORT**
