Mr. O’Malley responded to questions from the Board regarding the CMAR process.

On a motion by Dr. Boehm, seconded by Mr. Westbrook, the Board voted to Authorize the Administration to Accept the Guaranteed Maximum Price and Amend the CMAR Contract for the Agricultural Classroom Building on the Brenham Campus, the Third Phase of the W.J. “Bill” Rankin Agricultural Complex Project, with Collier Construction, Inc., in the amount of $2,213,212.00 as presented by the Administration.

REPORTS, ANNOUNCEMENTS, AND OTHER NON-ACTION ITEMS:

ITEM 14. REPORTS:

- BUILDINGS AND GROUNDS

Mr. O’Malley reviewed the Buildings and Grounds report and there were no questions from the Board (a copy of the Buildings and Grounds report is attached and made a part of these Minutes).

Buildings and Grounds:

Bryan Campus:

CPC Remodel - This is the elevator project in the CPC Building. The project will also include some remodeling for offices on the first floor. The project has been bid and awarded to Milleco Construction, Inc., for $194,324.00. The elevator is installed and needs to be inspected. Working on completing the office improvements and the flooring.

Administration/Classroom Remodel - This project is still waiting on several punch list items to be completed by the contractor, Merrell Construction, Inc. The punch list items have not been a deterrent to the functionality of the remodeled space, and we have not processed any pay requests from the contractor since substantial completion. Billy Ballow, architect with Goodwin Lassiter, Inc., and I met with the contractor on July 27, 2010, and discussed the few items that are needed to complete and close-out the project. I have also sent correspondence by mail outlining a time frame for him to complete the project or Blinn would have the punch list items completed and deduct the cost from his balance. I will do everything possible to have the contractor or his bonding company respond before I involve our attorney. On September 13th, I e-mailed the contractor stating that Blinn would seek bids to correct the millwork and replace the carpet in the
classroom building and deduct the cost of this work from the balance owed. I have also demanded that the contractor provide the close-out documents before we release any funds.

Allied Health HSC Campus - The project is under construction and according to the contractor, they are seven weeks ahead of schedule. We have started the equipment procurement, and the A/V design.

Building E, Student Center - This is a multi-phase project designed to enhance the student services offered on the Bryan Campus. I have negotiated a professional services agreement with Oza Bouchard, Morris Architects, and we have started the programming phase of the project. The first task will be a “Student Center Reimplementation Plan” that emphasizes the use of this space for student use. Once the “Student Center Reimplementation Plan” is complete, we will present our findings to the Board at the November Board meeting and seek additional authorizations for the design and construction phases. The budget for this project is $500,000.00, and will be funded in this year’s Repair and Replacement budget.

Landscaping/Signage - There is a need to enhance the landscaping at the new Administration Building and in the area of the Transfer Center. Additionally, signage needs to be improved at these locations, as well as, evacuation signage in all buildings. I will be working on a cost estimate for these improvements for consideration in next year’s budget.

Workforce/Dental Hygiene - These programs are located in the Post Office Campus Building at 301 Post Office Street. There is a request that when the RadTech Program relocates to the new HSC/Allied Health Building, the space freed up by this move be used to expand the workforce and dental hygiene programs. I will be working on cost estimates to expand their respective spaces.

Building H (presently, the Allied Health Building) - In Fall 2011, this space will become available for additional classroom and faculty offices. I will be working on cost estimates for an update and remodel of this space into classrooms.

Central Plant - We have had a very challenging summer and fall from an operational and maintenance prospective. We have an “ice bank” that needs to be replaced; four compressors that might need replacing, or at minimum, improved maintenance; a chiller that is limping along and will need replacement in the next two years; and the control system that should assist in monitoring, needs to be improved. In addition to the central plant needs, we have filter, valve, air handlers, and other accessories in each of the buildings that need daily maintenance. We have been in discussions with DBR, the mechanical engineering firm we discussed at the last Board meeting, to evaluate our system and operating procedures. Once we get information back from this firm, I will present the findings to the Board with a plan of action to make the necessary improvements.

Brenham Campus:

Student Housing - We have awarded the contract to Collier Construction, for $9,926,000.00 for the construction of the student housing facility. The project is under
construction and scheduled for completion by July 15, 2011. The existing agricultural shop building will be salvaged for use by Faith Mission and will be coordinated with Faith Mission and the contractor. The removal of the building will take place after the fall semester. The contractor has completed the subgrade preparation for the building slab and plumbing is starting to go in the ground. We have encountered our first unknown when the existing chilled water lines were uncovered directly under the proposed student housing facility. This will result in a change order to relocate the chill water lines out into the middle of Third Street.

Central Plant - Chiller #2 replacement project has been completed. There are some piping modifications and electrical improvements that we need to consider at the central plant and this plan will be studied and brought to the Board for future action.

Band Hall - The Band Hall project is scheduled to go out for bids on October 14\textsuperscript{th}, awarded at the October Board meeting, and start construction in early November. The project is scheduled for completion in August 2011.

Agriculture Facility - We have awarded a Guaranteed Maximum Price (GMP) of $2,133,000.00, to Collier Construction, for the construction of the Ag Shop Building. This project is under construction. The completion of this phase is January 2011, and we plan to host classes in this building for Spring 2011. The framing for the building has been erected and the contractor is placing the interior block walls.

The Ag Classroom Building – The project is prepared and out for bids. Collier Construction will take bids on October 19\textsuperscript{th}, and we will award a (GMP) at the October Board meeting.

Star of the Republic Museum - The chiller component of the HVAC system at the museum has reached its useful life. We have received bids and will award a contract for these improvements at the October meeting.

Campus Wide Fiber Extensions - This project has been bid and will be awarded at the October meeting.
