REPORTS, ANNOUNCEMENTS, AND OTHER NON-ACTION ITEMS:

ITEM 19. REPORTS:

• BUILDINGS AND GROUNDS

Mr. O’Malley presented the Buildings and Grounds as a written report (a copy of the report is attached and made a part of these Minutes).

Bryan Campus:

• Allied Health HSC Campus - The construction is complete.
• Building E, Student Center - The original scope of this project was divided into two phases: the student activity half of the building was scheduled for a remodel to accommodate student activities; and the food service half of the building was scheduled to be updated and expanded to meet the growth of the campus. Both of these phases have been put on hold until the funding of these improvements can be budgeted.
• Building H (presently, the Allied Health Building) - This project is complete.
• Central Plant - The chiller #2 replacement project is complete. The ice tank replacement project bid on February 14, 2012. Six (6) contractors submitted bids ranging from $117,600.00 - $137,000.00. The low bidder is Feldman Plumbing, which is a local Bryan plumbing contractor. Mr. Feldman has worked on several plumbing projects for the Bryan Campus in the past and has the credentials to complete this project. The Administration recommends that the College enter into a construction contract for $117,600.00 with Feldman Plumbing to replace the ice tank. The cost estimate for this project was $130,000.00 and the funds are budgeted in the R&R Account. The ice tank replacement project is under contract and awaiting delivery of materials before construction can get under way. The work should be complete by mid-July.
• Parking Lot Project - We have hired Bleyl & Associates, a local engineering firm, for the planning of street access from Villa Maria, as well as, the additional parking lot. The parking lot will be located north of the existing campus and will be accessible from the campus with a pedestrian bridge. The proposed lot can also be accessed with vehicular traffic from Villa Maria. The project will be divided into phases with an estimated construction cost for the first phase of $500,000.00. The first phase will consist of: a) pedestrian bridge, b) approximately 500 linear feet of street improvements connecting to Villa Maria, and c) parking spaces for approximately 100 cars. The project is budgeted within the R&R Budget. This project has been temporarily put on hold pending the negotiations with the City of Bryan in regards to their participation and other real estate opportunities that may be available within reasonable proximity to the campus.
Brenham Campus:

- Student Housing - The project is complete.
- Central Plant - We have hired DBR, Inc., for the design and construction phase services for an electrical switchgear replacement project, as well as, the replacement and upgrades to pumps and frequency drives at buildings located along the chilled water loop in zones 3 and 1. These improvements will enhance the capacity of our existing chillers and will provide a more efficient use of both energy and chilled water. The electrical switchgear project is complete. The report “Chilled Water Distribution and Energy Conservation Study” has been submitted and reviewed by the facilities staff. Recommendations from the report have been included as action items for the June Board Meeting. The 2012/2013 budget will include these capital improvement expenses.
- Band Hall - The project is complete.
- Agricultural Shop Facility - The project is complete.
- The Agricultural Classroom Building - The project is complete.
- Master Campus Lighting Plan - Late last year, representatives from the Facilities Staff, the Student Services Staff, the Police Department, and the Student Body toured the campus after dark to determine areas that needed improved lighting. We found several areas were light bulbs and fixtures simply need replacing and we found areas that need lighting improvements. The replacement of bulbs and fixtures has begun and will continue until completed. The areas needing additional lighting are being incorporated into a master lighting plan and, once completed, we will be seeking the Board’s approval for adding fixtures and lights to the campus. The design work for these improvements will be done in-house with the Facilities Staff. This same observation and eventual lighting plan is being scheduled for the Bryan Campus.
- Structural Issues - We have hired a structural consultant, Paul Malek with MBC Management, to evaluate two structural issues on the Brenham Campus. The first analysis provided by Mr. Malek in regards to the baseball field wall is very costly and we are presently discussing other options. There are no safety issues in regards to this structural issue. The second issue is the elevator addition at the Arts and Sciences Building. The addition is settling and pulling away from the main structure. This is not a safety hazard at this time, but a plan should be put in place to stabilize the movement before the condition worsens. Mr. Malek is preparing an analysis and recommendations to rectify this concern, and once completed, we will bring to the Board for further action. We are seeking Board approval in the June Board Meeting to obtain bids for the stabilization of the elevator shaft.
- Fieldhouse - The Fieldhouse at Spencer Field is being upgraded with painting and lighting improvements.
- Campus Storm Damage - on January 25, 2012, the Brenham Campus was severely damaged by high winds (possibly a tornado) and rain. The following is a list of buildings damaged by the storm:
  - Baseball Field - the lights at the field were all redirected toward the sky and several fixtures were taken out of service. The light project has been completed. The roof project has been completed.
  - 1004 Green Street House - The carport on the house was completely demolished. This is covered by insurance and will be replaced.
  - Greenhouse on Old Mill Creek Road - The greenhouse on Old Mill Creek Road was completely demolished. This structure was covered by insurance and will be replaced. The Greenhouse project is in design and should be available for bidding in July.
  - Blue Storage Building on Old Mill Creek Road - The overhead door of this structure was damaged. The door has been replaced.
  - Roofs - The roofs on all buildings are still being evaluated by the insurance adjuster. At this time, we know that the roof at Building #7 of the apartments has been totaled and will be completely replaced. Building #4 of the apartments suffered some damage and will have the ridge row replaced. Some of the dorms suffered damage that may require new roofs. The Building #7 roof project is under construction.
Major HVAC Equipment Replacement Schedule - The following is a list of major HVAC expenditures anticipated for the next five years based on current information and excluding any catastrophic failure of equipment before scheduled replacement date:

**Brenham Campus:**

2012-2013 Budget Year:
- Remove antiquated ice tank equipment and replace a 200-ton chiller (#1) with a new 500-ton chiller with the appropriate piping, pumps, and appurtenances for $750,000.00.

2013-2014 Budget Year:
- Remove and replace a 500-ton chiller (#3) with a new 500-ton chiller with the appropriate piping, pumps, and appurtenances for $550,000.00.
- Remove and replace the vintage 1988 air handling units (AHU) located in Old Main with the appropriate piping, controls, and appurtenances for $250,000.00.

2014-2015 Budget Year:
- Extend chill water piping and add Solons Hall, W.L. Moody, Jr. Library and Katherine Atkinson Hall to the central plant chilled water system for $250,000.00.
- Add cooling tower and replace cooling tower pumps at central plant for $250,000.00.

**Bryan Campus:**

2012-2013 Budget Year:
- Remove and replace ice tank for $130,000.00.

- Remove and replace a 500-ton chiller (#3) with a new 500-ton chiller with the appropriate piping, pumps, and appurtenances for $550,000.00.

*The above equipment replacements and estimates do not take into account any additional new buildings that may be constructed on either campus. This event would accelerate the need for additional cooling capacity.*

**Additionally, for the period of time that I have been the Executive Director of Facilities, Planning and Construction, the constant need to replace compressors, pumps, and minor equipment in the existing HVAC equipment has been inherent. The cost ranges from $100,000.00 - $200,000.00 each year for these items.**

A copy of the Board Comparative Fall & Spring Enrollment Report is available for Trustees to review.
